[Primary]: GEN - GENERAL CONCERN: GENERAL CONCERN
CUSTOMER STATES INSPECT AND QUOTE PRICE TO REPLACE 3
EACH TIRES (2 LEFT REAR, AND 1 RIGHT REAR INSIDE)

***Tires - 3: 255/70/r22.5**

A tire is a round component made of rubber and reinforced with chords or belts made of several choices of materials. The tire is filled with air or nitrogen and surrounds a wheel's rim to transfer a vehicle's load from the axle through the wheel to the ground and to provide traction on the road's surface. With only four small contact patches between you and the road you want them to be as good as they can possibly be.

Advisor Service Note

xtime CONDITIONS TERMS 8.14

Quote shows \$5,617.40, but that
is not correct. They can quote 3
different tires = 1 @ \$500 } estimate each
1 @ \$600 }
1 @ 700 }

They are not able to work with these rims,
so they would take it to a tire specialty shop
to be done.

Actual costs would be in a range
of \$1500 → \$1,800 → \$2,100, for 3 tires.
Plus disposal fees.

CUSTOMER STATES PROVIDE ESTIMATE TO REPLACE BOTH
ENGINE MOUNTS

Diagnostic: engine mountx2

Diagnostics when referred to in an automotive sense is the various testing done on the automobile to ensure safety and proper engine functioning. These tests are done with different sensors, computers and machines to establish a "cause and effect" relationship between what is working and what is not working with the automobile. The forms of diagnostics can range from brakes, to air conditioning, to

suspension and more

Exhaust Manifold Replacement: both sides

Exhaust manifolds are attached to the engine. Exhaust gases are expelled from each cylinder of the engine into the manifolds, where the gases are then released through the exhaust system at the rear of the vehicle. Exhaust manifolds are subject to extreme heat, which may cause them to warp or crack, necessitating their replacement.

\$3,677.76
