

PAID INTERNSHIP OPPORTUNITIES

SURF's internships provide a unique learning environment in which undergraduate students work with experts from around the world to gain valuable on-the-job experience.

What is your area of expertise?

SURF offers real-world opportunities in the following departments: Communications, Education, Engineering, Environment, Safety and Health (ESH), Operations, Science and Underground Access (UAG)

Application Deadline

January 20, 2023

Real-world experiences

Internships are all about the experience. They help students figure out what they want to do and give them the opportunity to work with people from around the world in a unique environment. All interns are required to go underground so, they must be physically able to spend long days below the surface, sometimes under demanding conditions. At SURF, safety is a priority, so interns must undergo safety training and be prepared to work with careful attention to safety at all times. At the end of their 10-week program, interns give a presentation about their experience at SURF.
